

Beyond Belonging Episode 2022  
Billiani 1911 presents:

Edelweiss,  
Fleuron  
*with Veretta,*  
Corolla,  
Frisée

**billiani**  
1911

Billiani presenta nuove collezioni di sedie, poltrone e tavoli introducendo i nomi di Constance Guisset e Philippe Bestenheider e proseguendo la collaborazione con Cristina Celestino, art director dell'azienda.

Nell'ambientare questi pezzi in una villa degli anni Cinquanta progettata da Carlo Scarpa, Billiani porta avanti la sua evoluzione, spinta a superare ulteriori confini. L'atmosfera intima e domestica segna l'ingresso sempre più deciso del brand nel mondo della casa. La scelta di una dimora storica disegnata dal grande architetto veneziano supera i confini del tempo restituendoci un'immagine atemporale sia dello spazio che dei prodotti.

(1)

(2)

(3)

Una villa costruita in Friuli Venezia Giulia alla fine degli anni Cinquanta è uno dei primi edifici residenziali progettati dall'architetto veneziano Carlo Scarpa.

Il progetto è contemporaneo a quelli del negozio Olivetti e del piano terra della fondazione Querini Stampalia a Venezia, che consacreranno Scarpa tra i maggiori architetti italiani contemporanei.

La villa presenta molte delle caratteristiche che diventeranno peculiari nelle architetture di Scarpa. Porte scorrevoli, passaggi nascosti (1) e doppie altezze rendono gli spazi fluidi e mutevoli, in una perfetta continuità spaziale (2).

Fondamentale è il rapporto tra interno ed esterno (3). Da ogni finestra si gode della vista sugli alberi e sul giardino, e viceversa. Le particolari decorazioni murarie creano una connessione ideale tra gli ambienti interni e la natura circostante.

Billiani presents new collections of chairs and tables, adding the names of Constance Guisset and Philippe Bestenheider to its roster of designers and continuing the collaboration with Cristina Celestino, art director of the company. With the setup of these pieces in a villa from the 1950s designed by Carlo Scarpa, Billiani moves forward with its evolution, expanding beyond new boundaries. The intimate domestic atmosphere reflects the brand's decisive entry into the world of home furnishings. The choice of this historic residence created by the great Venetian architect breaks down temporal barriers, conveying a timeless image of the space and the products.

A villa built in **Friuli Venezia Giulia** towards the end of the 1950s is one of the first residential buildings designed by the Venetian architect Carlo Scarpa. The project comes from the same period as Scarpa's masterpieces such as the Olivetti store and the ground floor of Fondazione Querini Stampalia in Venice, works that ratified his role as one of the greatest Italian contemporary architects. The villa features many characteristics that were to become recurring traits in Scarpa's architecture. Sliding doors, hidden passages and two-story zones make the rooms fluid and mutable, in perfect spatial continuity. The indoor-outdoor relationship is of fundamental importance. Every window offers fine views of trees and the garden, or glimpses of the inside from the open-air spaces. The remarkable wall decorations create an ideal connection between the interiors and the nature outside.

Billiani è un'azienda italiana che da più di un secolo produce sedie in legno. Si trova a Manzano, nel cuore di un distretto che sulla sedia ha costruito la sua fortuna e che vanta tuttora una filiera produttiva unica al mondo.

#### Billiani 1911

Billiani è un'azienda italiana che da più di un secolo produce sedie in legno nel triangolo della sedia, un territorio, il Friuli, di piccoli laboratori specializzati dove la cultura del legno ha radici profonde e la filiera è fatta di aziende artigiane dalla storia secolare. È un'impresa che crede nel made in Italy e nel design: i suoi prodotti, pensati insieme a designer italiani e internazionali, sono al contempo espressione di un patrimonio culturale e di una tradizione manifatturiera unica al mondo, oltre che una storia di famiglia.

#### Made in Italy

Billiani produce al 100% all'interno del triangolo della sedia, una filiera d'eccellenza fatta di aziende artigiane, ciascuna specializzata in una fase della produzione. Il lavoro di Billiani si lega e s'intreccia continuamente con quello del tessuto produttivo locale: una garanzia di qualità ma anche un investimento sulla filiera, perché ogni proposta d'innovazione arricchisce il know-how di tutto il distretto. È così che, mentre il made in Italy acquista un valore che va oltre il prodotto in sé per diventare espressione di un patrimonio culturale e manifatturiero condiviso, Billiani si impegna a essere un'impresa di comunità oltre che un'impresa di famiglia.

#### Billiani 1911

Billiani has been making chairs in Italy for well over a hundred years. The company is located in Manzano, in the heart of a district that has built its fortune based on chair manufacturing and which still boasts one of the world's unique production hubs, an area, Friuli, of small specialized workshops where the culture of woodworking has deep roots and the supply chain is made up of craft companies with centuries-old history. It is a company that believes in the importance of Made in Italy and design: Billiani products are conceived together with Italian and international designers, and are both an expression of a cultural heritage and a manufacturing tradition that is unique in the world, as well as a family history.

#### Made in Italy

Billiani produces 100% within the chair triangle, a hub of excellence made up of companies with a centuries-old history of craftsmanship, each specialising in a particular phase of the production process. Billiani's work is continually linked and interwoven with the local production network: a guarantee of quality but also an investment in the overall supply chain because each innovation enriches the know-how of the whole district. While Made in Italy has taken on a value that goes beyond the product itself to become an expression of a shared cultural and manufacturing heritage, this demonstrates how committed Billiani is to being a community-driven company, as well as being a family firm.

#### Design

Buon disegno e capacità di lavorare il legno sono da sempre la cifra dei prodotti Billiani. Il debutto nel mondo del design è al Salone del Mobile di Milano del 2002, con uno stand provocatorio progettato da Marco Ferreri, autore di una sedia che sfiora il Compasso d'Oro.

Mentre il legame con la tradizione è assicurato dai progetti del maestro Werther Toffoloni, il sodalizio con Emilio Nanni apre una nuova era: colorata, pop, spensierata. L'elenco dei designer si allunga così come quello dei progetti, alcuni dei quali entrano nei musei, dal MoMA di New York alla Triennale di Milano. Dal 2019 la direzione artistica è affidata a Cristina Celestino, architetto e designer milanese, cui viene affidato il compito di raccontare un nuovo capitolo della storia di Billiani in continuità con la storia, i materiali e le lavorazioni tipiche del territorio.

#### Design

Good design and wood-working ability have always been the hallmark of Billiani products. Billiani's debut in the design world was at the 2002 Milan Furniture Fair, with a provocative stand designed by Marco Ferreri, author of a chair that was short-listed for the Compasso d'Oro. While the link with tradition was ensured by the projects of master Werther Toffoloni, it was the partnership with Emilio Nanni that opened up a new era: colourful, trendy, carefree.

The list of designers grew, as did the list of projects, some of which were exhibited in museums, from the MOMA in New York to the Milan Triennale. In 2019 artistic direction was entrusted to Cristina Celestino, an architect and designer from Milan, who was given the brief of telling a new chapter in Billiani history alongside the history, materials, and typical workmanship of the local area.

Philippe Bestenheider nasce nel 1971 a Sion, Svizzera. Dopo la laurea in architettura, un Master in design industriale ed importanti esperienze internazionali, apre il suo studio lavorando tra la Svizzera e Milano. Nel 2010 riceve il Premio Italiano per l'Innovazione con la sedia Nanook. I suoi progetti si caratterizzano per un approccio al contempo razionale e sensuale, mescolando tradizione e sperimentazione, tra la progettazione assistita dal computer e la bottega di un artigiano.

Philippe Bestenheider was born in 1971 in Sion, Switzerland. After graduating in architecture, getting a Master in industrial design and important international experiences, he opens his own studio working between Switzerland and Milan. In 2010 he is awarded with the Italian Innovation Award for his Nanook chair. His projects are characterized by a rational but still sensual approach to the contemporary, mixing tradition and experimentation, between a computer-aided design and the workshop of a craftsman.

Cristina Celestino nasce a Pordenone nel 1980. Architetto e designer, nel 2011 fonda a Milano il brand Attico Design. Nel 2013 apre il suo studio, che si occupa di design del prodotto, architettura d'interni, allestimenti e direzione creativa, ricevendo numerosi riconoscimenti a livello internazionale. Dal 2019 si occupa della direzione artistica di Billiani.

Born in Pordenone in 1980. Architect and designer, in 2011 founded her brand Attico Design in Milan. In 2013 she opened her studio which centers around product design, interior architecture, FFE and creative design, and received numerous awards and international recognition. In 2019 Billiani entrusted Celestino with the artistic direction of the company.

Constance Guisset è una designer francese. Nel 2009 fonda uno studio specializzato in product & interior design e scenografia. Una costante ricerca di equilibrio tra ergonomia, delicatezza ed immaginazione marca il suo lavoro. I suoi oggetti sono tentativi di esplorare la reincarnazione del movimento nella leggerezza o nella sorpresa, difendendo l'importanza del comfort per il corpo. Le sue creazioni sono protagoniste in musei importanti come il Centre Pompidou di Parigi.

Constance Guisset is a French designer. She founded her studio in 2009, specialized in product design, interior design and scenography. Her work is marked by a search for balance between ergonomics, delicacy and imagination. Her objects are as many attempts to explore the incarnation of the movement by lightness or surprise, while defending a requirement of comfort and hospitality for the body. Her objects are now part of many museum collections including the Centre Pompidou in Paris.

Cat. Sedie, chairs  
Lounge, lounge chairs  
Sgabelli, stools

La collezione di sedie, sgabelli e lounge Edelweiss nasce dalla volontà di Philippe Bestenheider di confrontarsi con la materia legno. Le sedute, realizzate in multistrato di legno con spessori ridotti, uniscono il comfort di una superficie generosa all'eleganza formale e costruttiva del design svizzero. La forma arcuata dell'ampio schienale è studiata per permettere l'unione a incastro con il sedile, in un gioco di equilibrio tra forze di pressione e di trazione che simula una micro architettura e cita le sedie della tradizione alpina. La sedia, disponibile nelle due versioni con schienale pieno o forato, è ancora più leggera nella versione con i fori, segni grafici che portano al massimo la sperimentazione sulla riduzione della materia e danno vita a una seduta agile, ideale per il contract.

The Edelweiss collection of chairs, stools and lounge chairs is the result of Philippe Bestenheider's desire to come to terms with wood. The seats, in thin plywood, combine the comfort of an ample surface with the formal and constructive elegance of Swiss design. The arched form of the large back has been gauged to permit interlocking with the seat, in a game of balancing of forces of pressure and tension that simulates a micro-work of architecture, while referencing the chairs of the Alpine tradition. The chair is available in two versions, with full or perforated backs; it is even lighter in the version with holes, graphic signs that maximize the experimentation with reduction of material, giving rise to an agile seat that is ideal for contract projects.

Cat. Sedie, chairs

Nella sedia Fleuron di Constance Guisset, la razionalità del disegno, ispirato all'idea di un contrafforte che rinforza un muro, incontra la morbidezza della linea curva. Particolarità della sedia è la lavorazione posteriore, dove l'armonico innesto fra struttura e schienale è enfatizzato dal contrasto cromatico o di finiture. La sedia è disponibile sia in versione tutto legno sia nella più comoda variante imbottita.

In the Fleuron chair by Constance Guisset the rationality of the design, based on the idea of a buttress that reinforces a wall, meets the softness of a curved line. The chair stands out for the crafting of the back, where the harmonious graft between structure and the back is emphasized by the contrast of color and finish. The chair is available in an all-wood version or a comfortably padded variation.

Cat. Sedie, chairs  
Lounge, lounge chairs  
Sgabelli, stools

Linee morbide e geometrie semplici descrivono i contorni della collezione Veretta, caratterizzata dall'anello in legno di faggio massello curvato che cinge la seduta e incastona lo schienale. Le sedute, che possono essere imbottite anteriormente, valorizzano la materia legno, in particolare nella giuntura con l'anello del sedile dai terminali lavorati a mano.

Soft lines and simple geometry describe the contours of the Veretta chair, characterised by the feature ring in curved solid beechwood that surrounds the seat and houses the backrest. Veretta backrests can be padded at the front, showing off the natural wood, especially at the joints with the seat ring with its hand-crafted ends.

Tavoli, tables

I tavoli Corolla riprendono le linee morbide e armoniose dell'omonima collezione di sedute. Disponibili in tre misure, uniscono una base conica che termina con le caratteristiche ondulature ideate da Cristina Celestino per le sedute a un piano rotondo. Nella cornice esterna del piano, in massello di frassino arrotondato, sono incastonati diversi piani in legno di frassino tinto, travertino e sughero.

The Corolla tables maintain the soft and harmonious lines of the main Corolla seating collection. Available in three sizes, they combine a conical base that ends with the feature wave-effect, as designed by Cristina Celestino for the seating, with round tops. The solid ash rounded top edges are inset with various surface types at choice: stained ashwood, Travertine and cork.

Nella collezione Frisée, il segno morbido e avvolgente di Cristina Celestino esalta la materia e il saper fare di Billiani con colori puri, angoli che si trasformano in curve delicate e gambe che terminano a cipolla. Tavoli in diverse misure – due alti e due bassi – e sgabelli completano la collezione di sedute, richiamandone la leggerezza colta e sofisticata.

Cristina Celestino's soft and enveloping touch exalts Billiani's materials and know-how with pure colours, corners that turn into delicate curves, and bulbous leg-ends. Various sized tables – two high and two low – as well as barstools complete seating collection, setting off its cultured and sophisticated lightness.
